What is SmartLink™ ?

SmartLink™ is a system that uses special adhesion material to ensure that the glass mosaics are strong and firm, greatly reducing the risk of fall offs.

Why use... SmartLink™

Adherence

**100%
Grout Area**

Durable

Adherence

Due to the increased open area on the back and with the small connecting points between each mosaic tile.

SmartLink™ helps with the adhesion between the mosaic and tile adhesive, making the installation firm and strong.

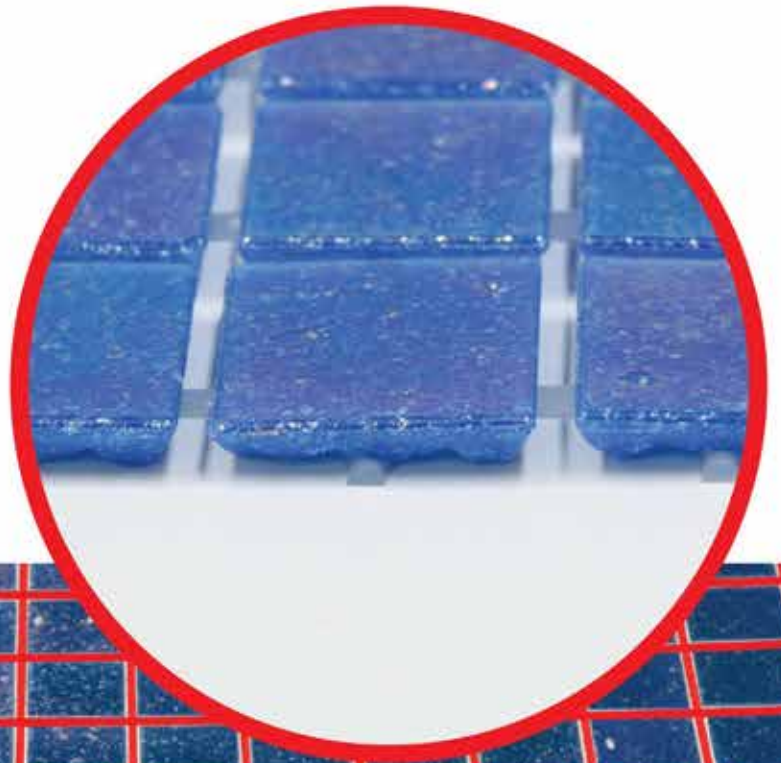

SmartLink™ without glue stains and increased open area

100% Grout Area

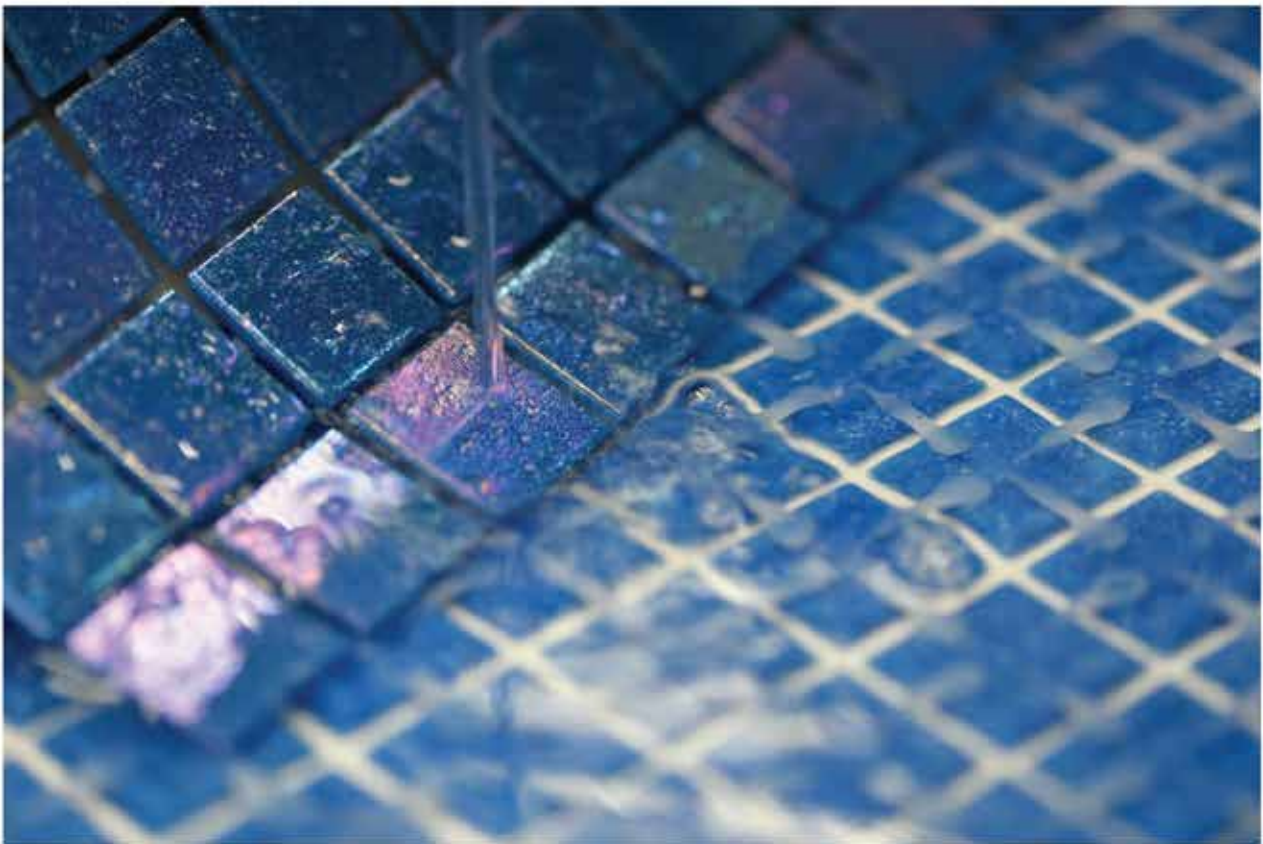

Means SmartLink™ does not invade any part of the joint.

The grout area is 100% free of any obstruction and it is the perfect condition when installing the glass mosaics.

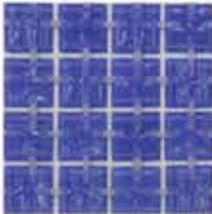

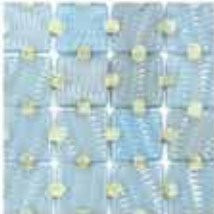

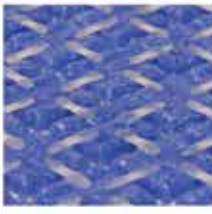

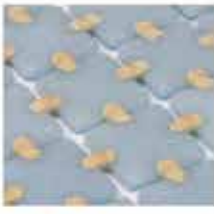

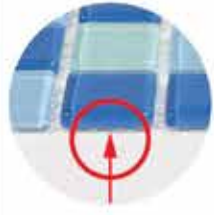

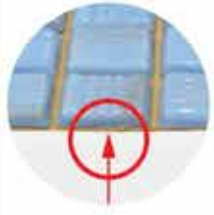

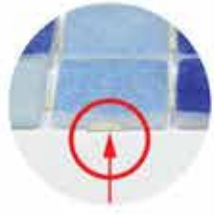

Durable

Because of the special joint material SmartLink™ connecting all the mosaic tiles. It is also resistant to all weather conditions, including wetness and ultraviolet rays.

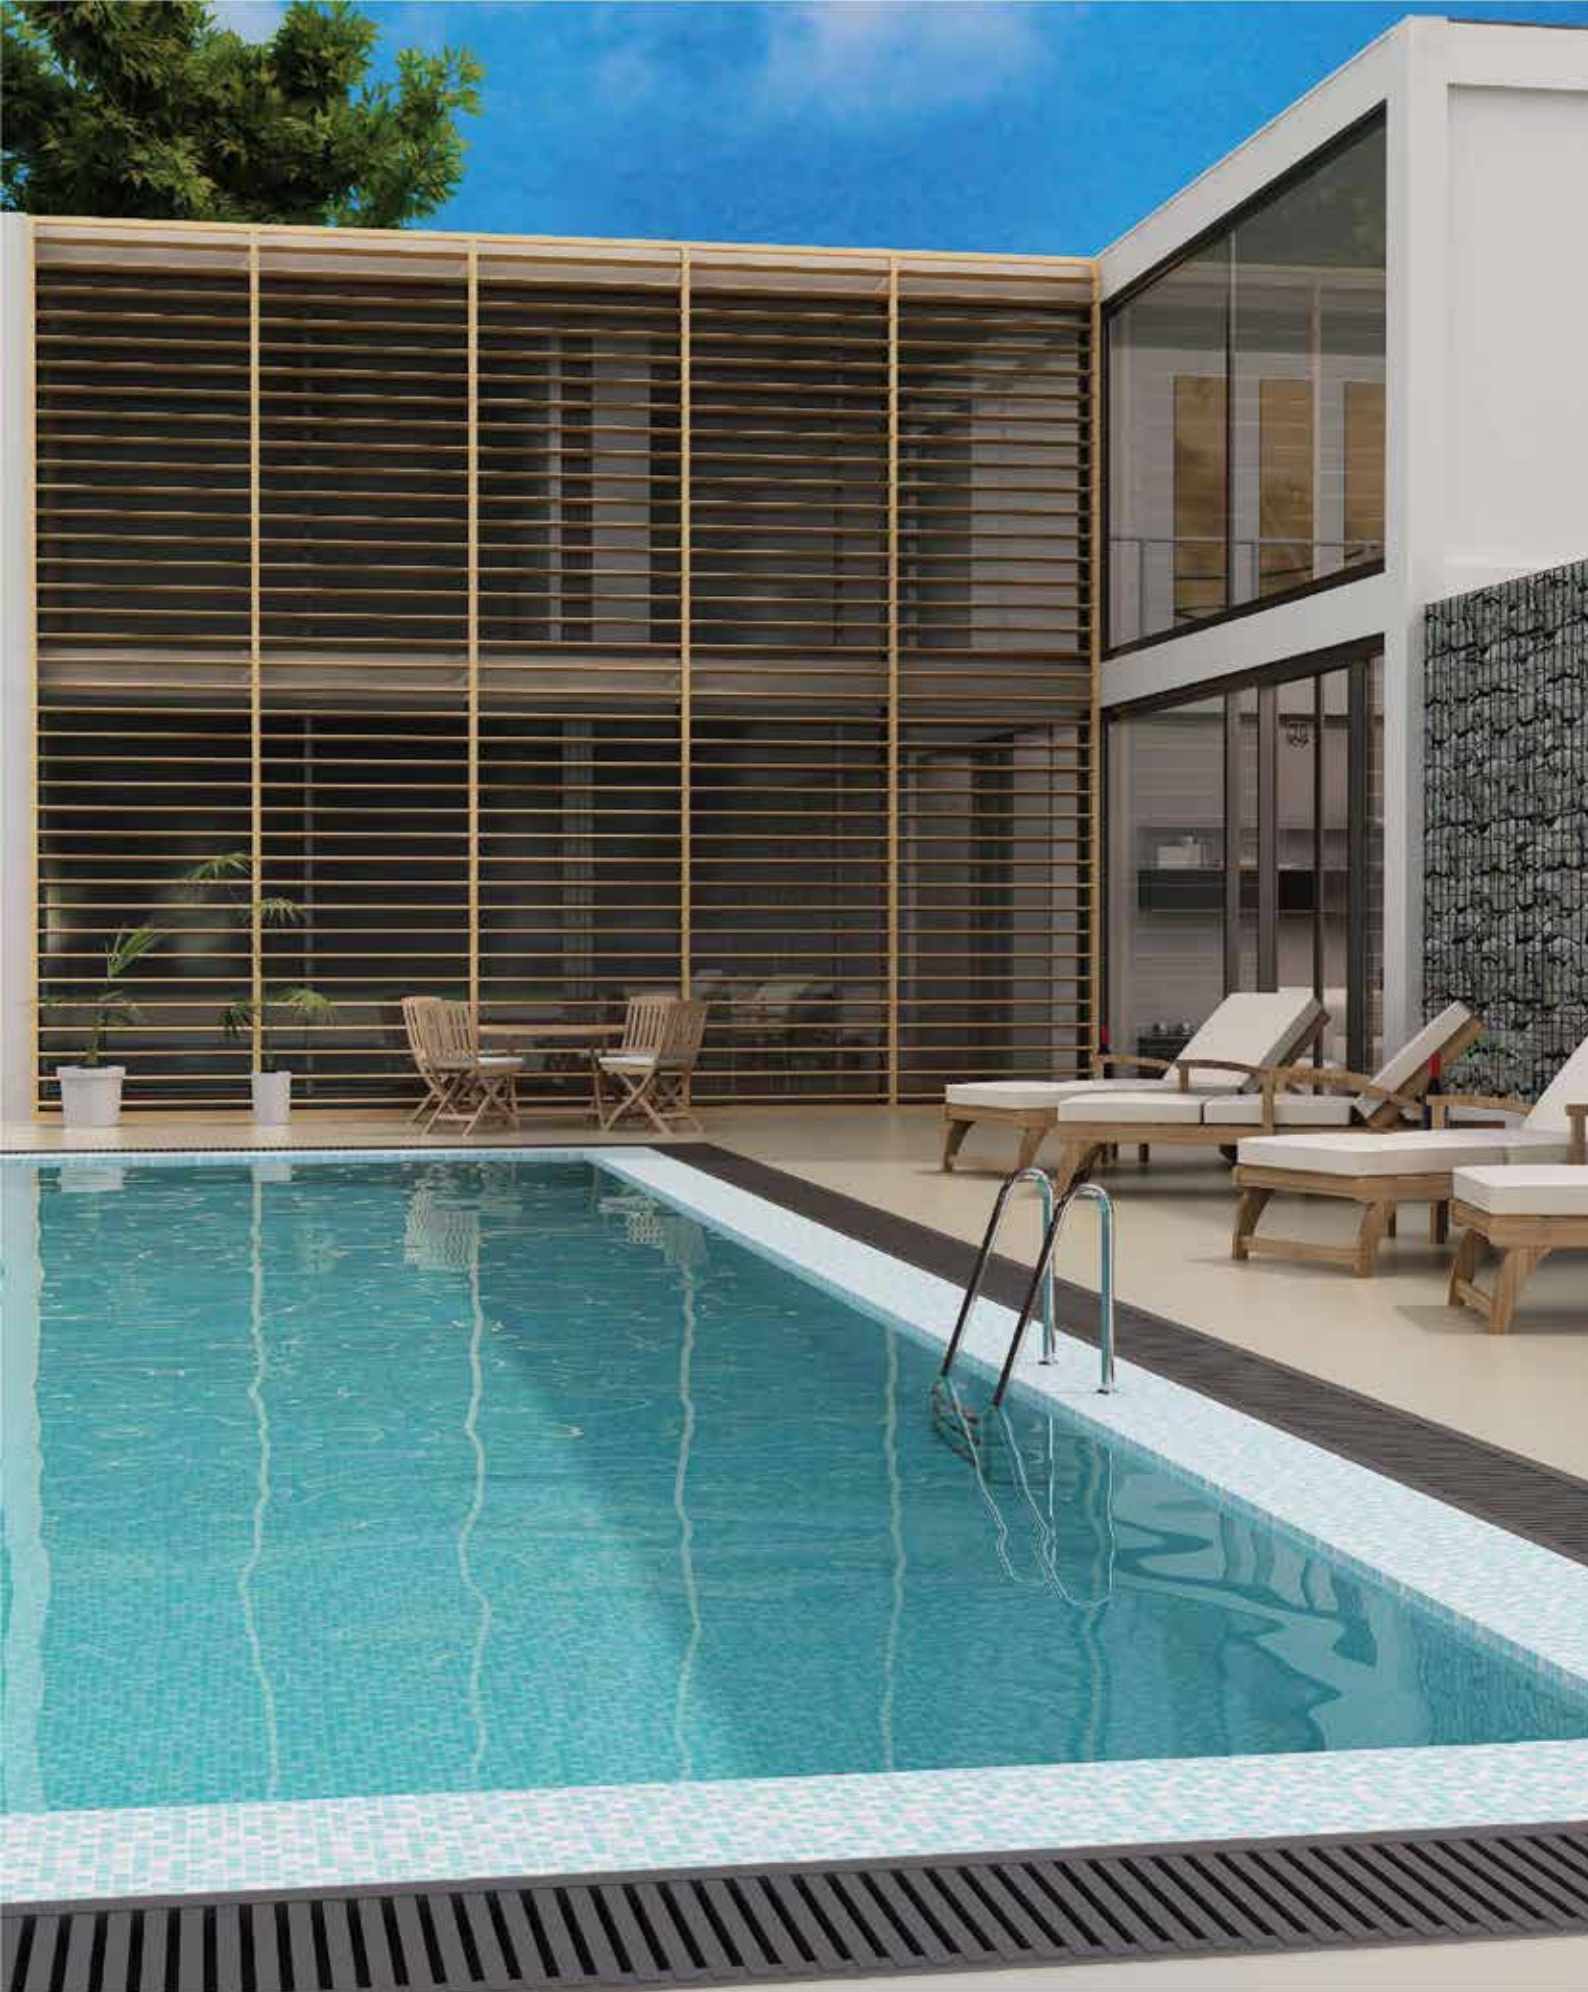

SmartLink™ can be submerged in water as it is totally water resistant

SmartLink™ Comparison

	SmartLink™	Nylon Net	Paper Mount	Dot Mounting
Joint Material				
Open space on the back				
Open space on the side				
Strength of joint material	★★★★★★	★★★★☆☆	★★★☆☆☆	★★★★★★
Resistance of joint material against weather	★★★★★★	★★★★☆☆	★★★☆☆☆	★★★★★★
Speed of installation	★★★★★★	★★★★☆☆	★★★☆☆☆	★★★★★★
No realignment of joint space	★★★★★★	★★★★☆☆	★★★☆☆☆	★★★★★★
Durability after installation	★★★★★★	★★★★☆☆	★★★☆☆☆	★★★★★★
